

Hope & Healing

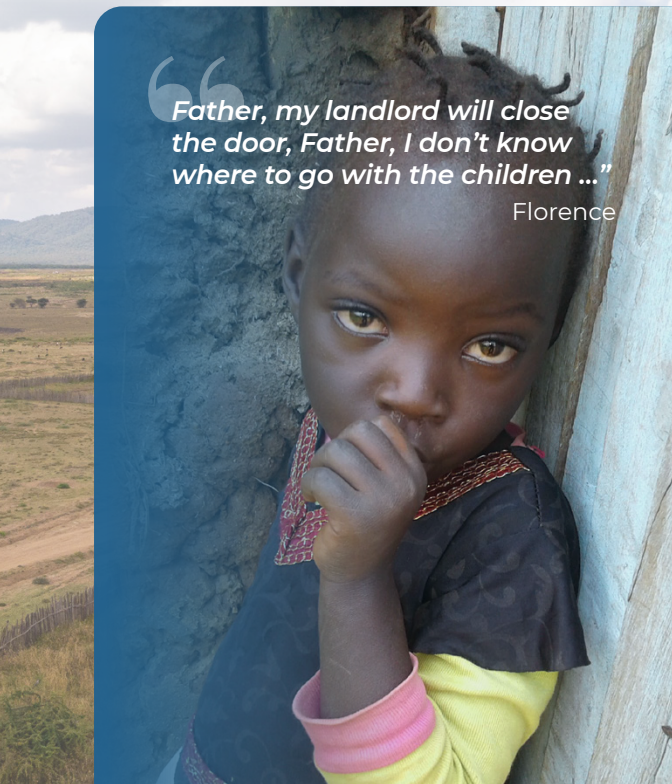

The work of Vincentian priests and brothers in Kenya now reaches more than 30,000 children and adults each year. Since 2020, pandemic restrictions put many day-laborers out of work. We are seeing many more people at our gates seeking food, medical assistance, and rent support. Your generosity helps us assist these neighbors, as well as carry on the formation of Vincentian priests and brothers, which now number 37.

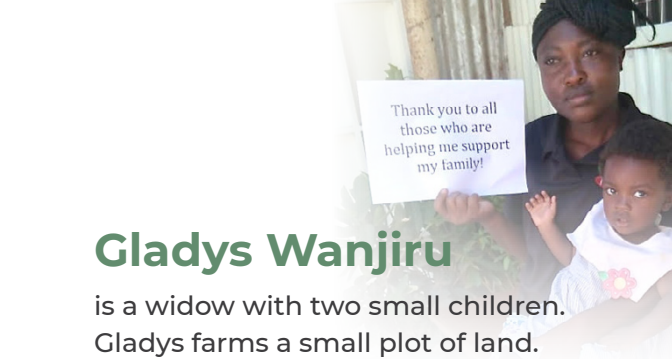

“Whatever you did for the least of my brother, you did for me.”

MATTHEW 25:40

“Father, my landlord will close the door, Father, I don't know where to go with the children ...”

Florence

Thank you to all
those who are
helping me support
my family!

Gladys Wanjiru

is a widow with two small children. Gladys farms a small plot of land. Her dairy cow was producing very little milk because she wasn't able to provide enough feed and clean water. She walks long distances to get water that is not polluted, as her children were becoming sick. Vincentian donors helped purchase a water tank where she can store piped

Vincentian priests and parish volunteers visit with families.

water, as well as bedding for her dwelling and shelter for her cow. She now has enough water

to grow grass to feed the cow, which has increased its milk production and afforded her family greater health.
